

The Paragon Home Artist

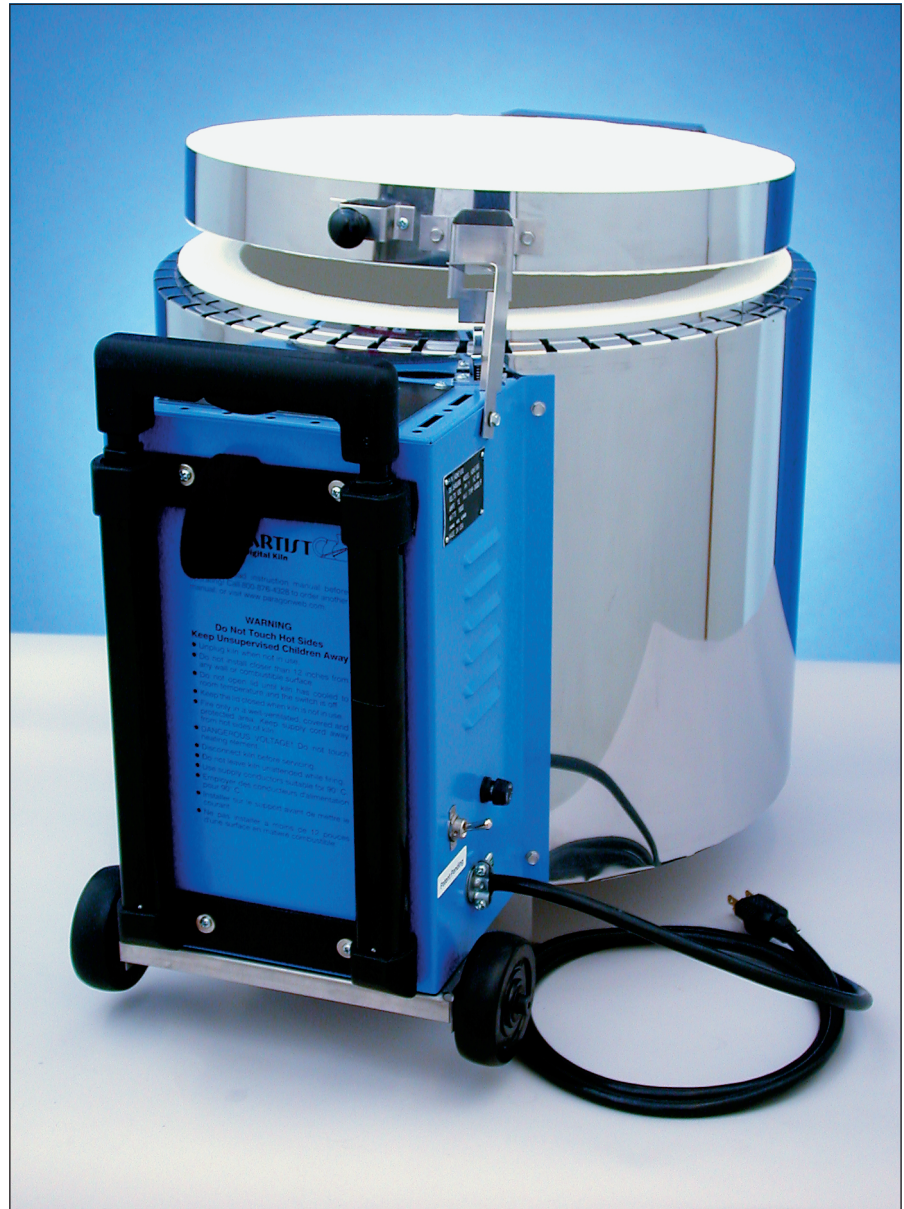

A Portable, Fast, Fun Kiln

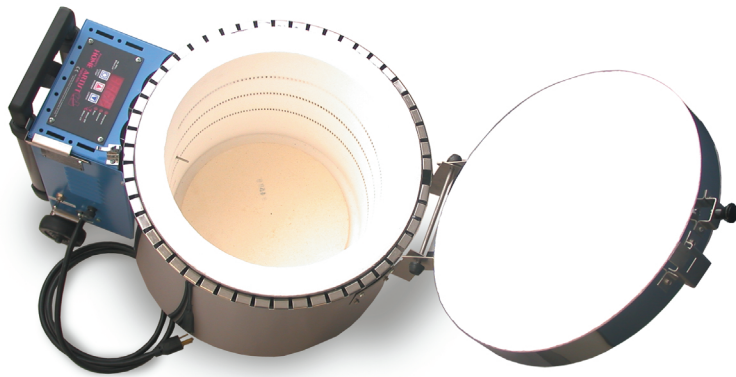

Making permanent, fired ceramic art has never been easier

The Paragon Home Artist Kiln will transform your creative expression into permanent fired ceramic art. This is the same process used by ceramic artists for thousands of years. Paints are transformed into vibrant colors. Imagine owning a kiln that will fire permanent, food-safe glazes.

The magic of the heat will continually delight and surprise you. After the kiln has cooled, the transformed ware is never exactly as you expected it.

Projects you can make

The Home Artist Kiln can harden clay and bake ceramic glaze, china paint, gold, and much more. Examples:

- Decorate your bathroom and kitchen with hand-painted ceramic tiles.
- Make porcelain and glass jewelry.
- Embellish ceramic wall hangings with your own poetry.
- China paint plates up to 10" wide. Make entire table settings and serving pieces.
- Fuse stained glass pieces; flatten glass bottles.
- Make silver clay jewelry.

Take the Home Artist Kiln on vacation

The Home Artist Kiln plugs into a standard 120 volt household outlet. It weighs only 38 pounds.

With the click of a button, the built-in luggage carrier snaps upright for easy moving. The kiln even includes wheels. Seminar teachers will appreciate a kiln they can take anywhere.

Home Artist Kiln safety features

The stainless steel jacket is vented to lower the surface temperature. A latch holds the lid securely closed. A safety switch is located on the side of the electrical box. A built-in fuse protects the controller.

The firing chamber is made of space-age ceramic fiber. This insulation is noted for energy efficiency.

Digital simplicity

The Home Artist Kiln operates with the simplicity of a microwave oven. The three-button controller heats at the speed and temperature you select. An easy

step-by-step instruction guide comes with the Home Artist Kiln so you can program your kiln for the different types of art you create: clay, ceramic glaze, china paint, and more.

Ordering information
